About Me

Enthusiastic and detail-oriented Software Engineer, currently working as an Intern Software Engineer at eArrow and a third-year undergraduate at the University of Colombo School of Computing. Strong foundation in SDLC, OOP, and design patterns, with hands-on experience in Go (Gin), microservices, Angular, and containerization.

Actively learning through real-world problem solving, analyzing multiple solutions, identifying optimal approaches, and collaborating closely with team members. Passionate about building scalable, efficient, and maintainable software, with strong teamwork, adaptability, and a continuous learning mindset.

Eager to bring strong problem-solving skills, technical expertise, and a proactive mindset to a full-time Software Engineer role, delivering reliable and innovative digital solutions.

Experience

Intern Software Engineer – eArrow

Oct 2025 – Present

- Developing the **reVamp platform**, a configurable payroll system with **microservices-based architecture** using Go (Gin) and Angular, supporting diverse organizational hierarchies across multiple companies.
- Implementing **RESTful APIs** and a **rule-driven payroll engine** to manage payroll rules, hierarchy configurations, and approval workflows efficiently.
- Collaborating in **Agile teams** to deliver maintainable solutions while participating in **bug fixing, debugging, and performance optimization**.

Education

Bachelor of Science in Computer Science

June 2023 – Present

University of Colombo School of Computing

Weeraketiya Central College – Maths: A, Physics: B, Chemistry: B | A/L

2020

Weeraketiya Central College – 7 A's and 2 C's for 9 subjects | O/L

2016

Projects

FixMe | [Frontend](#) | [Backend](#) | [Mobile](#)

June 2025 – Nov 2025

A multi-platform service application designed to easily connect customers with technicians for vehicle and home repair services.

- Technician tracking system for real-time location monitoring
- Separate web portals for admins and service centers, with mobile apps for technicians and customers
- Technologies: React.js, Node.js, Express.js, Firebase, Flutter, GitHub

School Attendance Making System | [Frontend](#) | [Backend](#)

July 2025 – Aug 2025

A system that helps mark attendance by entering a code, eliminating manual methods. This is a new and innovative approach.

- Uses React hooks and implements layered architecture in Spring Boot with OOP concepts to reduce tight coupling
- Technologies: Spring Boot, MySQL, React, GitHub

Customer Orders Management System | [Backend](#)

June 2025 – July 2025

- Developed a web-based system to manage selling and buying items
- Uses interfaces, enums, and exception handling with OOP concepts for better system management
- Technologies: Java Spring Boot, MySQL

VetiPlus (Pet Care Community Platform) | [Web](#)

Apr 2024 – Apr 2025

A comprehensive MVC-based web app that streamlines communication and services between pet owners, vets, assistants, and salons, featuring appointment bookings, breeding services, profile management, and GitHub-powered collaboration.

- Real-time appointment and service management for veterinarians and pet salons
- Role-based access and communication between pet owners, doctors, assistants, and salons
- Breeding registration, special offers, and business profile management with a user-friendly interface
- Technologies: HTML, CSS, JavaScript, PHP, MySQL

Restaurant Food Ordering System | [Web](#)

Apr 2024 – June 2024

A full-stack MERN app built as a group project to simplify online food ordering, allowing menu browsing, order placement, and driver assignment.

- Built Driver Management with full CRUD operations using React.js, Node.js, and MongoDB
- Used useState and useEffect hooks for dynamic UI and real-time updates
- Integrated secure RESTful APIs with role-based access for handling driver operations
- Technologies: React.js, Node.js, Express.js, MongoDB

Achievements

- **PearlHacks – Hackathon:** Reached the Final Top 10 Teams
- **Hack Like A Girl – Hackathon:** Reached the Final Top 10 Teams

Skills

Programming: Java, JavaScript, PHP, C, C++, Python, Go

Web Development: Spring Boot, React.js, Express.js, Node.js, CodeIgniter, Gin

Mobile Development: Flutter

Database: MySQL, Firebase, MongoDB

Tools & DevOps: Git/GitHub, REST APIs, Postman, Jira, Docker (Basics), CI/CD (Basics), Kafka

Other: Team Collaboration, Problem Solving, Adaptability, Creativity, Project Management

Courses

- | | |
|--|--|
| • Java Programming: Solving Problems with Software | Coursera |
| • Java Intermediate | Sololearn |
| • OOPs in Java | Great Learning Academy |
| • Dockerize Spring Boot Application | Great Learning Academy |
| • AWS Educate Introduction to Cloud 101 | Amazon Web Services |
| • Career Essentials in GitHub Professional Certificate | Microsoft + LinkedIn |
| • Web Design for Beginners | University of Moratuwa |
| • Career Essentials in Cybersecurity | Microsoft + LinkedIn |
| • Agile Requirements Foundations | LinkedIn Learning |
| • Getting Started with Chef in DevOps | Simplilearn |
| • HackerRank Node.js (Basic) | HackerRank |
| • Software Engineer Intern Certification | HackerRank |
| • Web Development Virtual Internship with CodeAlpha | CodeAlpha |
| • Exploratory Data Analysis for Machine Learning | Coursera |
